

June, 2020

Research Assistant - Student Position at PEPTICOM Ltd.

Unique opportunity for gaining experience in the biotech
drug discovery industry during your studies

Pepticom is a drug discovery company employing computational chemists, software engineers and biologists. Pepticom's unique AI platform allows discovery of novel peptides drug candidates for use in the pharmaceutical and agriculture industries.

Tasks include:

- Screening drug candidates.
- Quantifying biomolecular interactions using MicroScale Thermophoresis (MST).
Previous experience with the method is not required.
- Day-to-day lab duties and responsibilities.
- Part-time job with flexible working hours.

Requirements:

- B.Sc in Biology (2nd/3rd year students can also apply) *, or equivalent degree.
- Outstanding students.
- Previous lab experience is an advantage.
- We are looking for responsible people, team players with excellent technical skills.
